

Trail of extinct and active volcanoes, earthquakes across Europe project 2015-2016
term 1 activity report (Sagalassos effect to earthquake and volcano crater lake trip).

A group including 47 students and 5 teachers went to Suleyman Demirel University Geophysics Department of Geological and Geotechnical Earthquake Research Center in Isparta –which is 125 km north of the city of ours.

Photo 1: Students getting off the bus.

Prof. Dr. Sakir Sahin (SDU, Geophysical Eng. Ch. Dir.), Assoc. Prof. Dr. Umit Yalcin Kalyoncuoğlu and assistants welcomed us.

Photo 2: Geological and Geotechnical Earthquake Research Center

Prof. Dr. Sakir Sahin (SDU, Geophysical Eng. Ch. Dir.), Assoc. Prof. Dr. Umit Yalcin Kalyoncuoğlu and assistants informed them about their study and volcanoes and earthquakes.

Photo 3: Students and teachers listening the presentation.

Photo 4: The project presentation in the Research Center.

We watched a video about the subject and they answered student's and teacher's questions. They told that they are very excited about 2016 Turkey Meeting and they are going to help us through.

Photo 5: Video presentation.

The group left the university and went to famous crater lake (Golcuk). They made observations on volcanic formations.

Photo 6: Examination at Golcuk lake.

Then we went to Sagalassos –which is an ancient city have suffered from major earthquakes.

Photo 7: Fault line at Sagalassos.

We observed the effects of earthquakes and saw the fault line very clearly.
