

Trail of extinct and active volcanoes, earthquakes across Europe project 2015-2016
term 1 activity report (meetings with students at school).

We made 9 lessons (40 minutes each) about the project to the 9th and 10th grades.

Photo 1: A student giving presentations.

Before the lessons we applied a survey on students.
They watched the video that Suleyman Demirel University gave us.

Photo 2: Geography teacher giving presentations.

The students -who are in the project- gave presentations.

Photo 3: Watching "Windows into the Earth".

We made lessons named: Windows into the Earth, Creators and Destroyers, Up in the Air, Fire, Water, and Ice, Death and Recovery, Living with Volcanoes.

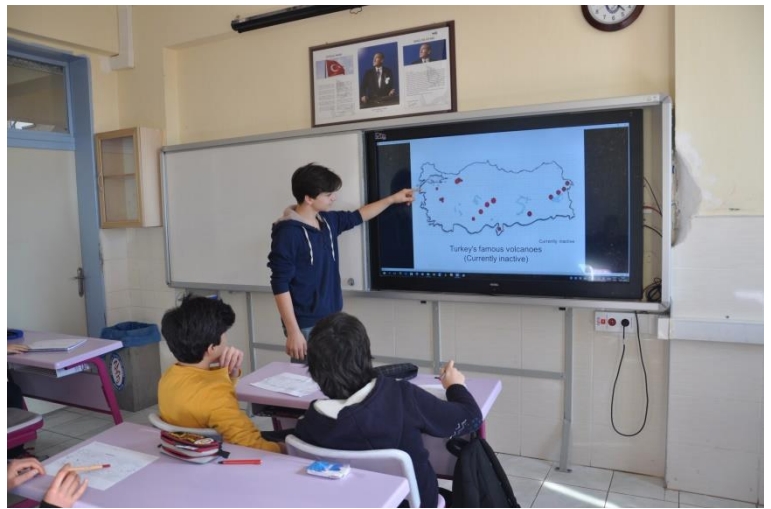

Photo 4: Famous volcanos in our country.

Students listened the presentations curiously.

Photo 5: Famous volcanos in the World.

We repeated the survey at the end of the lessons. The students' information about volcanos, Geology, Geography, mountains etc. increased.

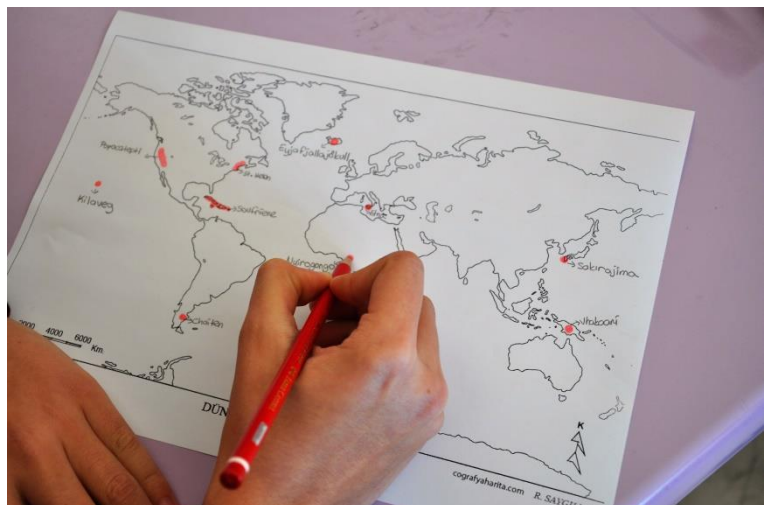

Photo 6: Students placed on the map the World's famous volcanoes.
